GWINNETT PLACE CID

UPDATE

Concept plan complete for road upgrade

CID-contracted traffic experts have completed a concept design to realign the Venture Drive-Pleasant Hill Road-Gwinnett Place Drive intersection. Plans calls for widening Venture Drive from Pleasant Hill Road to Steve Reynolds Boulevard, allowing two through lanes in each direction and two-way left turn movement.

The new design will improve area mobility by adding more options and better traffic flow as work progresses to dramatically remake the Interstate-85/Pleasant Hill Road bridge.

A recently approved agreement with Gwinnett County allows the CID to begin the necessary engineering for the project, which has also received approval for future sales tax funding. The CID is now seeking up to $2.5 million in grant funds from the Georgia Transportation Infrastructure Bank for the project.
